PROFESSIONAL SUMMARY

Experienced professional focused on meeting or exceeding objectives seeking Web Developer position. Offers advanced knowledge of industry best practices. Recognized for leadership, planning abilities and clear, direct communication style.

WORK HISTORY

Web Developer

Paul M. Pool

- Served as ongoing web developer for contract roles with numerous individual clients needing custom web development projects conducted then tied to their SAAS Systems
- HTML5, JavaScript, Bootstrap, and PHP and various other programs were all used to ensure client satisfaction.
- Provided front-end website development using WordPress, Drupal and other editing software

IT Project Manager,

The Product Source

- As the IT Project Manager for The Product Source, it's been my primary duty to maintain all systems and functionality of those systems while developing out newfound measures in setting up SaaS Systems, all while managing and overseeing the lifecycle of all IT oriented projects throughout the construction and manufacturing levels within the business
- In addition to the afore mentioned responsibilities, also responsible for ensuring that all remote workers are able to log in and access project-based systems through a secure VPN, and while maintaining the servers utilized to ensure a safe workspace, and client user experience for web security purposes, and to prevent data or website hacking

Supervisor

Amazon - Indianapolis, IN

Successfully developed out and trained an advanced team of professionals composed of 4 coaches, and 285 full time team members for Amazon's fulfillment team.

Musician & Private Music Instructor

Independent

Taught beginner to advanced level guitar and bass while touring across the US with a variety of artists

- Additionally served as a technical consultant & stage manager for on stage performers.

Deck Seaman

United States Navy

- Served on board USS Tortuga LSD 46 that included 6-month deployment to Somalia and the Mediterranean
